

## Idaho Cleanup Standards for Hydrocarbon Contaminated Groundwater

Product	Parameter/ Constituent	Lab Test Protocol & Number	Detection Level	Notification Level	Action Level	Cleanup Level
Gasoline	BTEX, Naphthalene, MTBE, EDC	EPA 8260	*	Above Screening Level	Above Screening Level	site specific
	EDB	EPA 8011	*	Above Screening Level	Above Screening Level	site specific
Diesel	BTEX	EPA 8260	*	Above Screening Level	Above Screening Level	same as gasoline
	PAH	EPA 8270	*	Above Screening Level	Above Screening Level	site specific

\* Dependent on screening level concentration in RBCA rule, see note.

**Note:** Idaho has developed rules for risk based corrective action for petroleum release sites. The rules can be found at <http://adm.idaho.gov/adminrules/rules/idapa58/0124.pdf> . The rules contain screening levels for soil and groundwater. These rules are in the process of being updated to include soil vapor screening levels.

**Website:** A guidance document to accompany the RBCA for Petroleum Releases rules is in the process of being finalized. Draft guidance can be found at <http://www.deq.idaho.gov/waste-mgmt-remediation/remediation-activities/risk-evaluation-manual.aspx> .
